BioSystems 35 (1995) 241–245

Bio Systems

Subject index

Volume 35 (1995)

Absorption spectroscopy; Bacteriorhodopsin; *Halobacterium halobium*; Retinal analogs; Polymer matrix; Electric field **35**, 129

Adaptability; Programmability; Molecular computing; Synergy; Function support; Organizations; Information system; Information processing **35**, 229

Advanced materials; Photoelectric effects; Bacteriorhodopsin; Molecular devices; Reverse engineering; Optoelectronic; Biomimetic science; Biomembranes **35**, 117

Alamethicin; Protamine; Bacteriorhodopsin; Electrical oscillation **35**, 123

Analog of bacteriorhodopsin; Bacteriorhodopsin; Photocycle of bacteriorhodopsin and its analog; Intermediates of photocycle **35**, 133

Artificial cells; Enzymes; Informational societies; Societies; Functional voids **35**, 167

Bacteriorhodopsin; Alamethicin; Protamine; Electrical oscillation **35**, 123

Bacteriorhodopsin; Analog of bacteriorhodopsin; Photocycle of bacteriorhodopsin and its analog; Intermediates of photocycle **35**, 133

Bacteriorhodopsin; *Halobacterium halobium*; Retinal analogs; Polymer matrix; Electric field; Absorption spectroscopy **35**, 129

Bacteriorhodopsin; Holographic thin films **35**, 141

Bacteriorhodopsin; Optical memory; Molecular electronics; Biomaterials; Purple membrane **35**, 145

Bacteriorhodopsin; Photoelectric effects; Molecular devices; Advanced materials; Reverse engineering; Optoelectronic; Biomimetic science; Biomembranes **35**, 117

Bacteriorhodopsin; Purple membrane; Self-assembled monolayers **35**, 137

Basic reproductive ratio; HIV/AIDS; Mathematical models; Mathematical epidemiology; Treatment and behavioral change **35**, 75

Biocomputation; Conservation laws; Measurement; Quantum computation; Uncertainty principle **35**, 209

Biocomputing; Molecular; Neural; Neuromolecular; Computing **35**, 223

Biocomputing; Single molecular circuits; Self-organization; Optoelectronics; Molecular devices/electronics; Information processing **35**, 233

Bioelectronic devices; Bioelectronics; Japanese project; MITI; FED **35**, 101

Bioelectronics; Bioelectronic devices; Japanese project; MITI; FED **35**, 101

Biological computation; Disequilibration; Measurement; Cellular automata **35**, 33

Biological rhythms; Dissipative structures; Cell behavior; Oscillatory enzymes; Chaos **35**, 1

Biomaterials; Optical memory; Molecular electronics; Bacteriorhodopsin; Purple membrane **35**, 145

Biomembranes; Photoelectric effects; Bacteriorhodopsin; Molecular devices; Advanced materials; Reverse engineering; Optoelectronic; Biomimetic science **35**, 117

Biomimetic science; Photoelectric effects; Bacteriorhodopsin; Molecular devices; Advanced materials; Reverse engineering; Optoelectronic; Biomembranes **35**, 117

Biomolecular computing; Molecular computing; Molecular neural net devices **35**, 195

0303-2647/95/$09.50 © 1995 Elsevier Science Ireland Ltd. All rights reserved

Biomolecular information processing; Structural programmability; Non-programmable computing; Computational efficiency **35**, 161

Biosynthesis stimulation; Electromagnetic (EM) fields; Na,K-ATPase function **35**, 175

Brooker-ion; Soliton; Molecular-switch **35**, 107

Canonical structures; Data bases; Variability analysis; Sequence analysis; Pattern recognition **35**, 25

Cell behavior; Biological rhythms; Dissipative structures; Oscillatory enzymes; Chaos **35**, 1

Cellular automata; Disequilibration; Measurement; Biological computation **35**, 33

Chaos; Biological rhythms; Dissipative structures; Cell behavior; Oscillatory enzymes **35**, 1

Charge-conformational interactions; Non-linear charge transfer; Molecular synergetics **35**, 171

Chloroplast; Photosynthetic oscillations; Mathematical model; Redox control; Photophosphorylation **35**, 63

Coenzymes; Immobilization; Enzymes **35**, 179

Computability; Non-Boolean logic; Measurement; Edge of chaos **35**, 213

Computational efficiency; Structural programmability; Non-programmable computing; Biomolecular information processing **35**, 161

Computing; Biocomputing; Molecular; Neural; Neuromolecular **35**, 223

Conformational processing; Electronic-conformational interaction; Percolation network; Neuromolecular computing; Multiscale molecular electronics **35**, 157

Conservation laws; Biocomputation; Measurement; Quantum computation; Uncertainty principle **35**, 209

Culture; Guidance of neurite outgrowth; Hippocampal neurons; Neuroblastoma cells; Patterned substrate **35**, 199

Cyclic voltammetry; Riboflavin; Spin drying; Thin films; Optical bleaching **35**, 153

Data bases; Variability analysis; Sequence analysis; Pattern recognition; Canonical structures **35**, 25

Disequilibration; Measurement; Cellular automata; Biological computation **35**, 33

Dissipative structures; Biological rhythms; Cell behavior; Oscillatory enzymes; Chaos **35**, 1

Edge of chaos; Non-Boolean logic; Measurement; Computability **35**, 213

Electric field; Bacteriorhodopsin; *Halobacterium halobium*; Retinal analogs; Polymer matrix; Absorption spectroscopy **35**, 129

Electrical oscillation; Alamethicin; Protamine; Bacteriorhodopsin **35**, 123

Electromagnetic (EM) fields; Biosynthesis stimulation; Na,K-ATPase function **35**, 175

Electronic-conformational interaction; Conformational processing; Percolation network; Neuromolecular computing; Multiscale molecular electronics **35**, 157

Enzymes; Artificial cells; Informational societies; Societies; Functional voids **35**, 167

Enzymes; Immobilization; Coenzymes **35**, 179

FED; Bioelectronics; Bioelectronic devices; Japanese project; MITI **35**, 101

Function support; Programmability; Adaptability; Molecular computing; Synergy; Organizations; Information system; Information processing **35**, 229

Functional voids; Enzymes; Artificial cells; Informational societies; Societies **35**, 167

Games; Learning; Observation; "Renju(Go-bang)" **35**, 219

Gap-junctions; Turing structures; Non-linear diffusion; Spatial asymmetry; Morphogenesis; Linear stability analysis **35**, 15

Guidance of neurite outgrowth; Culture; Hippocampal neurons; Neuroblastoma cells; Patterned substrate **35**, 199

Halobacterium halobium; Bacteriorhodopsin; Retinal analogs; Polymer matrix; Electric field; Absorption spectroscopy **35**, 129

Hippocampal neurons; Culture; Guidance of neurite outgrowth; Neuroblastoma cells; Patterned substrate **35**, 199

HIV/AIDS; Mathematical models; Mathematical epidemiology; Basic reproductive ratio; Treatment and behavioral change **35**, 75

Holographic thin films; Bacteriorhodopsin **35**, 141

Hypothalamo-pituitary-thyroid axis; Model; Pulsatile secretion **35**, 83

Immobilization; Enzymes; Coenzymes **35**, 179

Informational societies; Enzymes; Artificial cells; Societies; Functional voids **35**, 167

Information processing; Programmability; Adaptability; Molecular computing; Synergy; Function support; Organizations; Information system **35**, 229

Information processing; Single molecular circuits; Self-organization; Optoelectronics; Molecular devices/electronics; Biocomputing **35**, 233

Information system; Programmability; Adaptability; Molecular computing; Synergy; Function support; Organizations; Information processing **35**, 229

Intermediates of photocycle; Bacteriorhodopsin; Analog of bacteriorhodopsin; Photocycle of bacteriorhodopsin and its analog **35**, 133

Japanese project; Bioelectronics; Bioelectronic devices; MITI; FED **35**, 101

Langmuir monolayer; Two-dimensional domain; Porphyrin; Spiropyran **35**, 113

Learning; Games; Observation; "Renju(Go-bang)" **35**, 219

Linear stability analysis; Gap-junctions; Turing structures; Non-linear diffusion; Spatial asymmetry; Morphogenesis **35**, 15

Living system; Molecular computer; Quantum regulator; Neuron **35**, 203

Mathematical epidemiology; HIV/AIDS; Mathematical models; Basic reproductive ratio; Treatment and behavioral change **35**, 75

Mathematical model; Photosynthetic oscillations; Chloroplast; Redox control; Photophosphorylation **35**, 63

Mathematical models; HIV/AIDS; Mathematical epidemiology; Basic reproductive ratio; Treatment and behavioral change **35**, 75

Measurement; Biocomputation; Conservation laws; Quantum computation; Uncertainty principle **35**, 209

Measurement; Disequilibration; Cellular automata; Biological computation **35**, 33

Measurement; Non-Boolean logic; Computability; Edge of chaos **35**, 213

Memory-type organic photoconductor; Neural device; Variable sensitivity; Synaptic weight; Neural network **35**, 189

MITI; Bioelectronics; Bioelectronic devices; Japanese project; FED **35**, 101

Model; Pulsatile secretion; Hypothalamo-pituitary-thyroid axis **35**, 83

Molecular; Biocomputing; Neural; Neuromolecular; Computing **35**, 223

Molecular computer; Quantum regulator; Neuron; Living system **35**, 203

Molecular computing; Biomolecular computing; Molecular neural net devices **35**, 195

Molecular computing; Programmability; Adaptability; Synergy; Function support; Organizations; Information system; Information processing **35**, 229

Molecular devices; Photoelectric effects; Bacteriorhodopsin; Advanced materials; Reverse engineering; Optoelectronic; Biomimetic science; Biomembranes **35**, 117

Molecular devices/electronics; Single molecular circuits; Self-organization; Optoelectronics; Information processing; Biocomputing **35**, 233

Molecular electronics; Optical memory; Biomaterials; Bacteriorhodopsin; Purple membrane **35**, 145

Molecular neural net devices; Molecular computing; Biomolecular computing **35**, 195

Molecular synergetics; Non-linear charge transfer; Charge-conformational interactions **35**, 171

Molecular-switch; Soliton; Brooker-ion **35**, 107

Morphogenesis; Gap-junctions; Turing structures; Non-linear diffusion; Spatial asymmetry; Linear stability analysis **35**, 15

Multiscale molecular electronics; Conformational processing; Electronic-conformational interaction; Percolation network; Neuromolecular computing **35**, 157

Na,K-ATPase function; Electromagnetic (EM) fields; Biosynthesis stimulation **35**, 175

Neural; Biocomputing; Molecular; Neuromolecular; Computing **35**, 223

Neural device; Memory-type organic photoconductor; Variable sensitivity; Synaptic weight; Neural network **35**, 189

Neural network; Neural device; Memory-type organic photoconductor; Variable sensitivity; Synaptic weight **35**, 189

Neuroblastoma cells; Culture; Guidance of neurite outgrowth; Hippocampal neurons; Patterned substrate **35**, 199

Neuromolecular; Biocomputing; Molecular; Neural; Computing **35**, 223

Neuromolecular computing; Conformational processing; Electronic-conformational interaction; Percolation network; Multiscale molecular electronics **35**, 157

Neuron; Molecular computer; Quantum regulator; Living system **35**, 203

Non-Boolean logic; Measurement; Computability; Edge of chaos **35**, 213

Non-linear charge transfer; Charge-conformational interactions; Molecular synergetics **35**, 171

Non-linear diffusion; Gap-junctions; Turing structures; Spatial asymmetry; Morphogenesis; Linear stability analysis **35**, 15

Non-programmable computing; Structural programmability; Computational efficiency; Biomolecular information processing **35**, 161

Observation; Games; Learning; "Renju(Go-bang)" **35**, 219

Optical bleaching; Riboflavin; Spin drying; Thin films; Cyclic voltammetry **35**, 153

Optical memory; Molecular electronics; Biomaterials; Bacteriorhodopsin; Purple membrane **35**, 145

Optoelectronic; Photoelectric effects; Bacteriorhodopsin; Molecular devices; Advanced materials; Reverse engineering; Biomimetic science; Biomembranes **35**, 117

Optoelectronics; Single molecular circuits; Self-organization; Molecular devices/electronics; Information processing; Biocomputing **35**, 233

Organizations; Programmability; Adaptability; Molecular computing; Synergy; Function support; Information system; Information processing **35**, 229

Oscillatory enzymes; Biological rhythms; Dissipative structures; Cell behavior; Chaos **35**, 1

Pattern recognition; Data bases; Variability analysis; Sequence analysis; Canonical structures **35**, 25

Patterned substrate; Culture; Guidance of neurite outgrowth; Hippocampal neurons; Neuroblastoma cells **35**, 199

Percolation network; Conformational processing; Electronic-conformational interaction; Neuromolecular computing; Multiscale molecular electronics **35**, 157

Photocycle of bacteriorhodopsin and its analog; Bacteriorhodopsin; Analog of bacteriorhodopsin; Intermediates of photocycle **35**, 133

Photoelectric effects; Bacteriorhodopsin; Molecular devices; Advanced materials; Reverse engineering; Optoelectronic; Biomimetic science; Biomembranes **35**, 117

Photophosphorylation; Photosynthetic oscillations; Mathematical model; Chloroplast; Redox control **35**, 63

Photosynthetic oscillations; Mathematical model; Chloroplast; Redox control; Photophosphorylation **35**, 63

Polymer matrix; Bacteriorhodopsin; *Halobacterium halobium*; Retinal analogs; Electric field; Absorption spectroscopy **35**, 129

Porphyrin; Langmuir monolayer; Two-dimensional domain; Spiropyran **35**, 113

Programmability; Adaptability; Molecular computing; Synergy; Function support; Organizations; Information system; Information processing **35**, 229

Protamine; Alamethicin; Bacteriorhodopsin; Electrical oscillation **35**, 123

Pulsatile secretion; Model; Hypothalamo-pituitary-thyroid axis **35**, 83

Purple membrane; Bacteriorhodopsin; Self-assembled monolayers **35**, 137

Purple membrane; Optical memory; Molecular electronics; Biomaterials; Bacteriorhodopsin **35**, 145

Quantum computation; Biocomputation; Conservation laws; Measurement; Uncertainty principle **35**, 209

Quantum regulator; Molecular computer; Neuron; Living system **35**, 203

Redox control; Photosynthetic oscillations; Mathematical model; Chloroplast; Photophosphorylation **35**, 63

"Renju(Go-bang)"; Games; Learning; Observation **35**, 219

Retinal analogs; Bacteriorhodopsin; *Halobacterium halobium*; Polymer matrix; Electric field; Absorption spectroscopy **35**, 129

Reverse engineering; Photoelectric effects; Bacteriorhodopsin; Molecular devices; Advanced materials; Optoelectronic; Biomimetic science; Biomembranes **35**, 117

Riboflavin; Spin drying; Thin films; Cyclic voltammetry; Optical bleaching **35**, 153

Self-assembled monolayers; Bacteriorhodopsin; Purple membrane **35**, 137

Self-organization; Single molecular circuits; Optoelectronics; Molecular devices/electronics; Information processing; Biocomputing **35**, 233

Sequence analysis; Data bases; Variability analysis; Pattern recognition; Canonical structures **35**, 25

Single molecular circuits; Self-organization; Optoelectronics; Molecular devices/electronics; Information processing; Biocomputing **35**, 233

Societies; Enzymes; Artificial cells; Informational societies; Functional voids **35**, 167

Soliton; Molecular-switch; Brooker-ion **35**, 107

Spatial asymmetry; Gap-junctions; Turing structures; Non-linear diffusion; Morphogenesis; Linear stability analysis **35**, 15

Spin drying; Riboflavin; Thin films; Cyclic voltammetry; Optical bleaching **35**, 153

Spiropyran; Langmuir monolayer; Two-dimensional domain; Porphyrin **35**, 113

Structural programmability; Non-programmable computing; Computational efficiency; Biomolecular information processing **35**, 161

Synaptic weight; Neural device; Memory-type organic photoconductor; Variable sensitivity; Neural network **35**, 189

Synergy; Programmability; Adaptability; Molecular computing; Function support; Organizations; Information system; Information processing **35**, 229

Thin films; Riboflavin; Spin drying; Cyclic voltammetry; Optical bleaching **35**, 153

Treatment and behavioral change; HIV/AIDS; Mathematical models; Mathematical epidemiology; Basic reproductive ratio **35**, 75

Turing structures; Gap-junctions; Non-linear diffusion; Spatial asymmetry; Morphogenesis; Linear stability analysis **35**, 15

Two-dimensional domain; Langmuir monolayer; Porphyrin; Spiropyran **35**, 113

Uncertainty principle; Biocomputation; Conservation laws; Measurement; Quantum computation **35**, 209

Variability analysis; Data bases; Sequence analysis; Pattern recognition; Canonical structures **35**, 25

Variable sensitivity; Neural device; Memory-type organic photoconductor; Synaptic weight; Neural network **35**, 189
